DETAILED ACTION

Allowable Subject Matter

1. **Claims 51-116** are allowed.
2. The following is an examiner's statement of reasons for allowance: Avanzino et al. teach wafer based temperature sensors for characterizing chemical mechanical polishing processes. Wataya teaches a solid image-pickup device and method for manufacturing the solid image pickup device. The prior art of record does not teach an EIW unit for using sensing a process parameter of a process to manufacture an IC using IC processing equipment comprising a plurality of light sources, disposed on or in the substrate, to sample a process parameter performed by the integrated circuit processing equipment.

The prior art of record also does not teach enabling the plurality of light sources to output light; sampling the response to the light output by the plurality of light sources; and determining the process parameter using the sample response.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Avanzino et al. teach wafer based temperature sensors for characterizing chemical mechanical polishing processes. Wataya teaches a solid

image-pickup device and method for manufacturing the solid image pickup device.

Ohashi et al. teach a solid-state image pick-up device.
